SURFACE MOUNTED LUMINAIRE SL

15070708
SL 140 surface luminaire, DIFF-O-M8-55

- Flat and slim, surface mounted, length 140 - 840mm.
- Anodised aluminium housing, IP40
- M8 connector
- Diffuse acrylic cover
- Color temperature 4000 or 5700K

PRODUCT DESCRIPTION

Sangel developed the SL in response to the frequently occurring problem of space in mechanical and plant engineering. Machine manufacturers often require luminaires with a flat and slim design. With a height of around 18 mm and a width of around 30 mm, our new product will fit in almost every machine.

Featuring IP40 ingress protection, it cannot be penetrated by foreign bodies of 1.0 mm or larger. For even greater impermeability, a fully encapsulated version of the luminaire is available. Like the ELN series, a loop-through version of the SL series is also available, which means it can overcome additional challenges in machine illumination. The SL series not just meets diverse requirements, but regarding to its price it is a real highlight.

SPECIFICATIONS

Colour temperature	5700 K
IP Class	IP40
Length	140 mm
Material Glass	PMMA
Power Consumption	3.7 W
