

NS100 MACHINE VISION FILTER KIT

F/NS100

Filter kit NS100

- Neutral Density Swatch Filter Kit
- See the effects of stacked ND filters
- Test in both monochrome or color applications
- Larger size 43mm diameter filters

PRODUCT DESCRIPTION

The portable NS100 makes it easy to solve applications on-site, and includes all MidOpt Visible Neutral Density Filters.

This MidOpt Filter Kit allows you to:

- See the effects of stacked ND filters to test various optical densities
- Reduce light intensity in the visible spectrum without affecting color and contrast
- Test in both monochrome or color applications
- Solve applications quickly

Kit Includes:

- QR code to link filter specifications
- Larger size 43mm diameter filters
- Filter transmission curve
- ND030 Absorptive Neutral Density Filter | 50% Transmission
- ND060 Absorptive Neutral Density Filter | 25% Transmission
- ND090 Absorptive Neutral Density Filter | 12.5% Transmission
- ND120 Absorptive Neutral Density Filter | 6.25% Transmission
- ND200 Absorptive Neutral Density Filter | 1.0 % Transmission
- ND300 Absorptive Neutral Density Filter | 0.1% Transmission
- ND400 Absorptive Neutral Density Filter | 0.01 % Transmission
