

ARION SOLIDSAFE T16 PANEL

16020191

Panel 1900x200 mm, T16 (steel sheet)

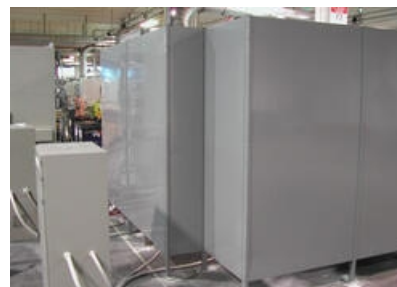

- Steel sheet panel
- System height 2080 (default)
- Easy to install

PRODUCT DESCRIPTION

The system is based on the same strong and solid design as ProSafe. The panels are made of 30x30 mm square tubes and are covered with 0.9 mm steel sheet. The panel, which provides a certain level of noise protection, can be mounted very close to the dangerous movement without compromising security and protecting against the presence of processes that need protection.

The panel provides adequate protection for the eyes in the welding work, while providing excellent protection against welding sparks and effectively stopping metal filings, wood chips and hot or dangerous liquids.
