

ARION PRO-TECT FEET 60X60

12060511

Post 60x60x1410 mm, straight

- Solid design, material dimensions 60x60x2 mm
- Easy and quick to install
- Standard lengths 1410 / 1700 / 2080 / 2700 mm

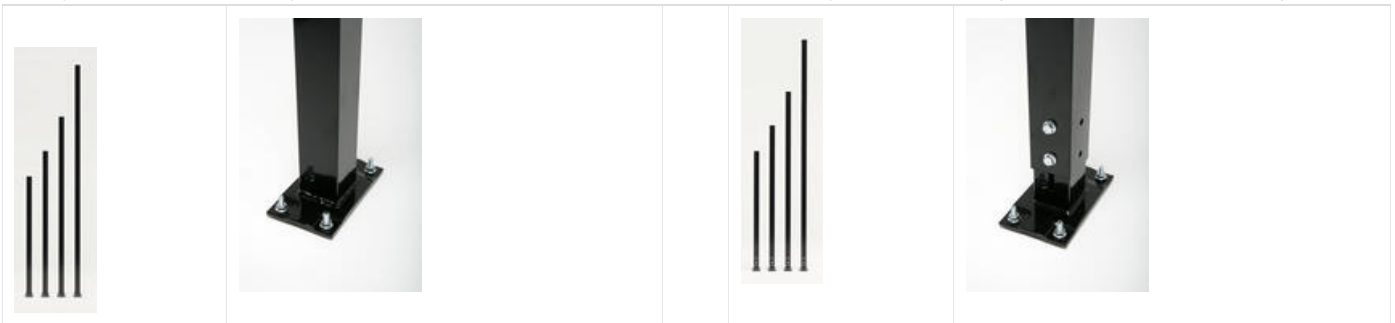

PRODUCT DESCRIPTION

Arion Pro-Tect fence posts are available with adjustable or fixed feet (adjustable feet can be turned in 90° increments). Material dimensions 60x60mm, pre-drilled and threaded holes ensure fast installation without extra work at the site. Same posts can be used with Arion doors.

Straight walls and corners have distinct posts which leaves no un-necessary holes on sight. 4-way posts available, with pre-drilled holes on each side.

Corners other than 90° require a pair of hinges (2 x 10000070).

Delivery includes all the necessary hardware and a plastic end cap. Posts are installed preferably with anchor bolts (installation hole diameter 10mm).

Note!

60x60 posts are pulver coated by default (black RAL9005) but all RAL tones are available by request as well as hot galvanized and stainless steel versions. Furthermore, standard posts can be equipped with feet made from stainless or galvanized steel thus making the assembly suitable for areas where the feet are regularly in contact with water.

SPECIFICATIONS

Adjustable	No
Color	Black RAL 9005
Height	1410 mm
Thickness Of Goods	2 mm
Weight	6 kg
Width	60 mm
