PRODUCT DESCRIPTION

The FPT300 is an industrial grade power supply for 3-phase networks incorporated in a rugged wall-mount housing with IP54 protection.

It provides two to four stabilized outputs that are galvanically separated from the input.

The negative potential of the outputs is permanently connected to PE within the unit.

The most outstanding features of the FPT series are the compact size, the wide operational temperature range, the extremely low input inrush current and the very high efficiencies, which are achieved by various design technologies.
