SAFETY SWITCH SK

601.6169.036
SK-A2ZM SAFETY SWITCH

- Robust plastic body
- Actuators can be repositioned by 180°
- Large selection of contacts
- UL, CSA and BG

PRODUCT DESCRIPTION

The SK safety position switch is an industry standard and can be used in virtually any application.

Thanks to design safety features conforming to VDE 0660 T200, IEC 60947-5-1 and the test regulations GS-ET 15, the SK is particularly suitable for personal protection applications. Its versatility is enhanced by the variable actuator head and two actuator openings.

SPECIFICATIONS

Cable entry	3x M20x1,5
Contact type	2 NC
Hold The Power Key	10 N
IP Class	IP65
Temperature range from	-30 °C
Temperature range to	80 °C
