PRODUCT DESCRIPTION

Lütze LCIS relay range offers compact design along with excellent usability. These relays are only 6,2mm wide and 90mm tall which makes them very compact and easy to install even in confined enclosures. LCIS relays can be installed in any position. All terminals (A1, A2 etc.) distinctively marked and additionally they can be identified by using standard 5x5mm or 6x12mm markers. All terminals can be connected with jumper combs connecting up to 16 poles. Push-in and screw terminals available.
