

## POWER SUPPLY 3-PHASE, 36 V DC DIMENSION Q SERIES

QT20.361 POWER SUPPLY 36VDC 480W 13A

- Output current of 13.3 A
- Up to 94.8% efficiency
- · High short-circuit currents
- · Several protective filter
- Maximum performance

## PRODUCT DESCRIPTION

Puls Dimension Q is a series of power supplies with very small construction dimensions and many technical advantages.

The unit has low inrush current (even during warm start), active PFC, which provides a power factor close to one, extended temperature range, as well as active protection against mains transients.

Furthermore, there is a relay output (DC OK) that falls when the output voltage deviates more than 10% from the set value.

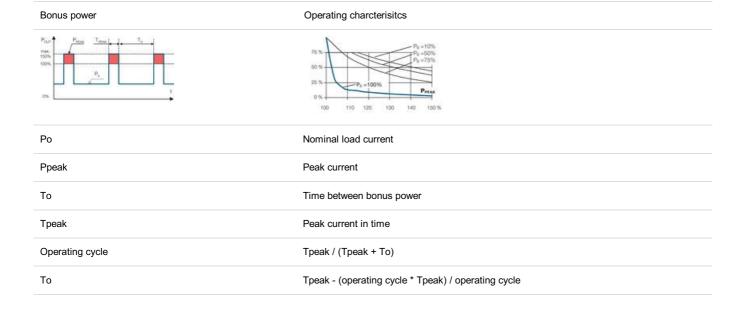

The bonus power provides 50% extra reserve with retained voltage which is an advantage when connected loads have high starting currents. The unit also provides a high short-circuit current that simplifies tripping of secondary fuses. Both the bonus power and short-circuit current is limited to 4 seconds to avoid constant overloading of the power supply and wiring.

High efficiency for long life and low temperature.

The power supply can be connected for two-phase operation Within up to +40°C. At higher temperatures, the load current is reduced.

## Bonus power

The power supply has bonus power that enables high power outlet with retained 36 V DC for 4 seconds, which is a major advantage when connected loads have high starting currents, such as the case with motors. How often you can use the bonus effect depends on the application. With the following diagram and formula, the repeat time can be calculated for each application. The bonus power is available as soon as the power supply is started and directly after a short circuit.

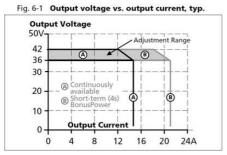

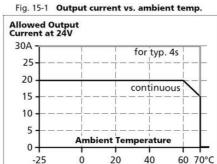

E.g. Nominal load current (Po) is  $6.6 \, \text{A}$ , Po = 50% of In. Peak current (Ppeak) is 16A = 120%. Peak time is  $3 \, \text{seconds}$ . Draw a vertical line at 120% of duty cycle, where the line crosses the Po = 50% horisontel draw a line to the duty cycle value. In this case, the value is about 0.68. 3 - (3x0,68) / 0.68 = 1.41. In this example, one can repeat the bonus effect with a gap of  $1.41 \, \text{seconds}$ .

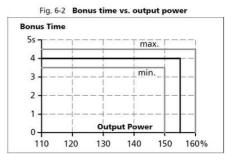

## **SPECIFICATIONS**

Height 124 mm  Depth 127 mm		
Depth 127 mm	Width	65 mm
	Height	124 mm
Weight 0,87 kg	Depth	127 mm
	Weight	0,87 kg

Clamp type	Spring-clamp
Series	Dimension Q
Approvals	CB, CE, CSA US, cRUus, cULus, GL
DC relay output	Yes
Material Protection	Aluminium
Hold-up time at 400 V AC, full load. Typical.	22 ms
IP Class	IP20
Active Transient	Yes
