PRODUCT DESCRIPTION

The CS-3000 neXt combines functionality with an appealing design. The new system is an important addition to the CS-3000 series, it is easy to clean and benefits from simplified installation, outstanding visual characteristics such as smooth transitions between tube and component and the high quality which Bernstein is known for. The wide range of components, the high strength of the system and the load capacity provide individual solutions.

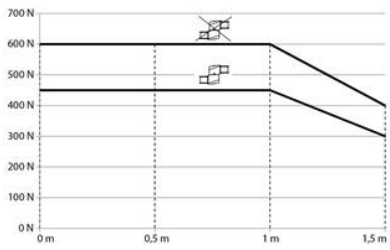

- System lengths from 250 mm up to 1,500 mm in 250 mm steps
- RAL 9006 component finish also available
- Optional powder coating of components and tubes
- Swivel angle 300° with angle limiter available
- Variety of components to suit your application
