ROBOT CONTROLLER KR C5

KUKA12400970
KR C5 micro

- Micro robot controller for LBR iisy
- Space saving
- Power supply & cable

PRODUCT DESCRIPTION

The KUKA KR C5 micro robot controller is an extremely space-efficient controller solution with an outstanding integration density of functions for small robot systems. The software is installed on an internal 60 GB mass memory.

The following interfaces are supported:

Digital 24V inputs/outputs
EtherCAT extension bus KEB
Ethernet-based fieldbuses (with corresponding KUKA software products)
smartPAD interface
Secure signals for cell security
USB interface
