

MAXTECH MEMBRANE KEYBOARDS

MB-3186

Test keyboard

- Keyboards with adhesive membrane
- Possibility to add components
- Free design
- Possible backlighting
- The low-cost option

PRODUCT DESCRIPTION

Membrane keyboards as customised solutions, giving designers a free hand in design. You can add components to the membrane, even LEDs to guide the use of the keys. A prerequisite for a successful finished product is a flat surface on which to glue the finished membrane keyboard. You can choose the length of the connecting cable and the type of connector that suits the connection.
