

MIDWEST OPTICAL - BANDPASSFILTER BP695

F/BP695-C

Bandpassfilter - standard, 695nm, for C-Mount

- IR bandpass
- Work area 665-730 nm
- For NIR fluorescence

PRODUCT DESCRIPTION

Midwest Optical Sytems bandpass filters are ideal for use in combination with LED or laser diode lighting. The filter consists of a precision polished glass filter with an anti-reflex coating. They are more rugged, thinner, less angular and have a very high transmission compared to conventional filters. Use of the bandpass filter enhances contrast and often undesirable effects of disturbing light from the surroundings are eliminated.

SPECIFICATIONS

Filter thread (thread diameter x pitch)

C-Mount
