TOSIBOX Mobile Client

- TOSIBOX Key
- TOSIBOX SoftKey
- TOSIBOX Mobile Client
- TOSIBOX 4G Modem

PRODUCT DESCRIPTION

Tosibox users can sign into platform and engage networks in many ways. The TOSIBOX® Key is physical token, TOSIBOX® SoftKey is a software code, and TOSIBOX® Mobile Client is a mobile app for Android or iOS.

Access the way you need

Typically, the TOSIBOX® Key is used by a platform administrator or in use cases where physical security is needed. The TOSIBOX® Key combined with the password enables physical-first two-factor authentication for the user.

The TOSIBOX® SoftKey is bound to workstation and user accounts. Like the physical key, the SoftKey provides Layer 2 or Layer 3 access for OT network engineers and technicians giving full visibility and control over the network devices they have been granted rights to.

The TOSIBOX® Mobile Client is an easy-to-use app for your Android or Apple device. It gives you the same user rights as the TOSIBOX® Software key – just use it conveniently wherever you are.
