

ARION CORROSAFE PANEL

ARION CORROSAFE

- Made of stainless steel
- Robust design
- Easy to install

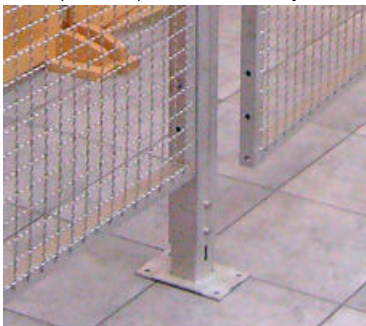

PRODUCT DESCRIPTION

This system is specially designed to work in corrosive environments such as installations close to the sea as well as indoor and outdoor environments with the presence of aggressive chemicals or air pollutants. CorroSafe is manufactured on request.

The system meets the requirements of the food industry and is based on the same strong and solid design as ProSafe and comes in different stainless steel grades. The panels are made of 30×30 mm stainless steel pipes. The posts are made of 60×60 mm stainless tubes and have either adjustable or welded feet.

Posts (60x60x2) available with adjustable or fixed feet.
